FOR THE BEST LAWN IN TOWN

DEEPBLUE Kentucky Bluegrass

Variety Name: Deepblue
Kind: Kentucky
Bluegrass
Genus: Poa
Species: pratensis

DEEPBLUE Kentucky Bluegrass is a strong, aggressive type, offering superior early sod performance. It has strong seedling vigor and improved sod tensile strength. In a Sod Strength Test conducted by Dr. Xunzhong Zhang and Dr. Sam Doak of Virginia Tech at the Lakehurst Research Farm, DEEPBLUE rated the top spot. It required an average of 45.30 pounds of pressure to tear the sod in five strength tests, which was the most of all the bluegrass varieties tested.

- Early Spring green-up
- Excellent seedling vigor
- Dark-green, broad bladed
- Mixes well with other grasses
- Very heat resistant

DEEPBLUE Kentucky Bluegrass in Turf Trials.

Deepblue is a
Blue Panther Kentucky
Bluegrass variety.
