

# MONTANA

## TURF-TYPE TALL FESCUE

Montana has helped “change the game” for sod growers across America! Why? Montana’s “tight-knit” growth, dark-green color, fine leaf texture, fast germination, and lower fertilizer requirements make it the best choice.

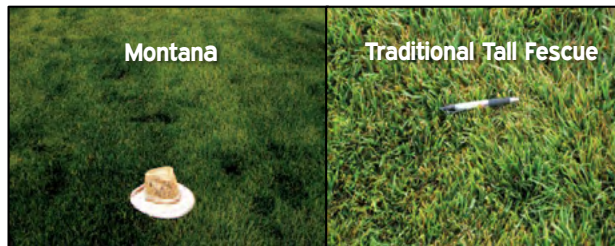

### SEEDING RATES:

Overseeding:  
3 – 5 lbs. per 1,000 sq. ft.

Bare Soil:  
5 – 7 lbs. per 1,000 sq. ft.

(Top): Montana Tall Fescue on the new polo fields at the Equestrian Center at Great Meadows in The Plains, VA.

(Left): Montana Tall Fescue showing its rich, dark-green color on a sod farm. Montana is being grown in the same field next to a “typical” tall fescue on the same farm (Right).

VARIETY	TURF QUALITY	COLOR	DENSITY	TEXTURE
	Mean	Mean	Mean	Mean
<b>Montana</b>	<b>6.6</b>	<b>6.9</b>	<b>6.4</b>	<b>6.5</b>
Falcon 4	6.0	5.8	6.2	5.9
Raptor	6.0	6.2	5.9	5.8
Reserve	4.2	4.4	5.0	5.0

At Cascade’s Tall Fescue Turf Trials in Aumsville OR (2006), **MONTANA RATED THE HIGHEST** in Turf Quality, Turf Color, Leaf Texture, and Turf Density!

VARIETY	GERM/ESTAB	COLOR	TEXTURE/UNIFORMITY	TURF QUALITY
	Mean	Mean	Mean	Mean
<b>Montana</b>	<b>5.3</b>	<b>7.3</b>	5.0	<b>5.3</b>
Ebony	5.0	6.2	5.0	5.0
Mustang 4	4.2	4.9	6.3	5.2
Montauk	5.1	5.3	4.0	4.7

**MONTANA SCORED FIRST IN THREE OF FOUR CRITERIA** at Virginia Beef Sod Farm, Latham Turf Research evaluation plots in Haymarket, VA! This is the same location previously designated as the (VA-2) unirrigated test site for the National Turfgrass Evaluation Program.
